

Okta Implementation Success Story: Leading Biotech Innovator Powered by FIT Solutions – Scalable Identity for a \$500M+ Biotech Company

Overview

Our client, a rapidly growing biotech company valued at over \$500 million, is advancing patient-specific stem cell therapies for Parkinson's disease. As operations expanded and the application landscape diversified, the client's existing identity solution (Azure Active Directory) proved limiting in scale, integration capability, and administrative ease.

To future-proof their identity and access management, they turned to FIT Solutions, who recommended and implemented Okta as a unified, secure platform.

Why Okta (and FIT Solutions)?

With FIT Solutions guiding the strategy and rollout, the client transitioned to Okta to gain:

- Over 7,000+ native app integrations.
- SSO and MFA for streamlined, secure access.
- Automation workflows for onboarding/offboarding.
- Intuitive UI and delegated admin tools for scalability.
- Centralized app management with full visibility.

FIT Solutions' Role

FIT Solutions executed a seamless rollout by:

1. Conducting an identity ecosystem audit.
2. Migrating apps from Azure AD to Okta in phases.
3. Deploying SSO and MFA policies.
4. Automating provisioning via Okta Workflows.
5. Delivering training and post-launch support.

Applications Integrated in Okta

Application	Purpose
Intranet	Internal Communications
AWS Client VPN	Secure Network Access
Box	Cloud file Storage & Sharing
Carta	Equity and Cap Table Management
Compliance Quest	Quality & Compliance Tracking
Data Ninja	Data Pipeline and Processing
Data Ninja - Validation	Data QA and Validation
Effy Freshservice	IT Service Desk and Support
Freshworks	Customer Support/Ticketing
GitHub Enterprise Cloud	Code Repository & Collaboration
Microsoft 365	Email, Teams, Productivity Suite
NetSuite	ERP and Financials
NetSuite Sandbox	ERP Testing/Staging
Okta Admin Console	Admin Controls for Okta
Okta Browser Plugin	Seamless Browser-based SSO
Okta Dashboard	Unified Application Portal
Okta Training	Internal User Enablement
Okta Workflows	User Lifecycle Automation
OneDrive	Microsoft Cloud Storage
Oracle Cloud	Enterprise Operations Suite

Applications Integrated in Okta

Application	Purpose
Pitchbook	Market Research and Investor Data
Point Purchasing	Procurement System
RightFind	Document and Literature Discovery
Smartsheet	Project/Task Management
Smartsheet v2	Alternate Instance of Smartsheet
Smartsheets SSO	Okta SSO Integration for Smartsheet
SVB Travel & Expense	Expense and Travel Reporting
TriNet	HR, Payroll, and Benefits Platform

Microsoft 365 Integration: A Key Win

With FIT Solutions' implementation, Okta was integrated deeply with Microsoft 365. This enabled:

- Unified access to Outlook, Teams, and OneDrive.
- End-to-end provisioning automation.
- Enhanced security with MFA across all users.

Results at a Glance

- 27+ business apps secured and centralized.
- MFA enforced organization-wide.
- User onboarding time reduced by 70%.
- IT overhead cut significantly through automation.
- Elevated user experience and compliance readiness.

Conclusion

Thanks to FIT Solutions and Okta, this leading biotech company now operates with a secure, scalable, and user-friendly identity infrastructure. With centralized access, automated workflows, and MFA protection, the client is well-positioned to grow and innovate without compromise.
