

f i t solutions

"I cannot say enough about the FIT Solutions team. Their support of our network and vision for improving our hardware to increase productivity at a cost we can afford has been **a HUGE win for me as an IT Director.**

Their quarterly meetings to review our systems and security are **the most well planned-out meetings I have experienced** in network support.

Cybersecurity is a HUGE responsibility when you are dealing with client information and personal data. I can safely say **I sleep well at night knowing the FIT Cybersecurity team are overseeing these needs and executing at the highest level of data protection."**

—David Yocum, Director of IT
Bellus Academy
