

Client Review

I wanted to take a minute to reach out with a “Thank You” to the FIT / Stryker Team.

The Bank recently completed our Network Security Audit & Penetration Test and received the findings report this week. The results of the audit, as reflected in our findings report, could not have been better.

I fully believe the success of this audit was a result of our relationship with FIT / Stryker and the hard work of the Stryker engineers. With a special shout-out to Gio Delgado. Gio has worked tirelessly on day-to-day issues for the Bank, and when it comes to the security or the Bank’s network – he gets it. He works proactively to address areas before they become a larger concern, and when there are audit recommendations, he works those to resolution.

Thanks again and looking forward to continuing a successful partnership.

Thanks, Chuck
